

Example 4c-1 – Construct the shear force and bending moment diagrams.

$$\sum M_B = 0 = 2k(4' + 8' + 12' + 16') - V_A(20')$$

$$\underline{V_A = 4k}$$

$$\sum F_y = 0 = V_A - 2k - 2k - 2k - 2k - V_B$$

$$\underline{V_B = -4k}$$

$$\Delta V = \int w dx \quad \frac{dV}{dx} = w \quad \Delta V = P$$

$$\Delta M = \int V dx \quad \frac{dM}{dx} = V$$

$$\underline{\underline{M_{MAX} = 24kft \quad 8 \leq x \leq 12ft}}$$
