

Example 4c-3 – Construct the shear force and bending moment diagrams.

$$\sum M_B = 0 = 18^k(12') + 24^k(18') - V_A(24')$$

$$\underline{V_A = 27^k}$$

$$+\uparrow \sum F_y = 0 = V_A - V_B - 24^k - 18^k$$

$$\underline{V_B = -15^k}$$

$$\Delta V = \int w dx \quad \frac{dV}{dx} = w \quad \Delta V = P$$

$$\Delta M = \int V dx \quad \frac{dM}{dx} = V$$

$$\underline{\underline{M_{MAX} = 180^k ft \quad x = 12 ft}}$$
