

Example 6a-1: Construct the ***influence line*** for the reaction at B.

$$\sum M_A = 0 = -1x + B_y(5')$$

$$\underline{B_y = \frac{x}{5}}$$

$$+\uparrow \sum F_y = 0 = A_y + B_y - 1$$

$$A_y = 1 - B_y = \underline{1 - \frac{x}{5}}$$

$A_y + B_y$
