

Example 2a-2: Find the reactions

$$\circlearrowleft \sum M_A = 0 = M_A - 9^k(4.5') - 5^k(10')$$

$$\underline{M_A = 90.5 \text{ k}\cdot\text{ft}}$$

$$+\uparrow \sum F_y = 0 = A_y - 9^k$$

$$\underline{A_y = 9^k}$$

$$+\rightarrow \sum F_x = 0 = A_x + 5^k$$

$$\underline{A_x = -5^k}$$
