

Draw the cash flow diagrams for the following investment scenarios assuming interest is paid at the end of each year:

1. Deposit \$1000 into a bank account and leave it for 3 years, then withdraw “F”.
2. Deposit \$388 per year for 3 consecutive years, then withdraw “F”.
3. Deposit \$97 per quarter for 12 consecutive quarters, then withdraw “F”.
4. Deposit \$490 at Time 0, \$400 18 months later, and \$195 2 months after that, then withdraw “F” at the end of Year 3.
